MASTER PLAN — GrowthAI Lead Generation Agency

Delhi-Focused Digital Marketing Machine

🛠️ TOOLS WE'RE BUILDING

#	Tool	Description	Status
1	🌐 **Agency Landing Page**	A stunning, conversion-optimized website to attract clients with testimonials, services, and a contact form	✅ DONE
2	📊 **Lead Scraper + Pipeline**	A Python script to scrape Google Maps for businesses without websites or with poor SEO + Dashboard to manage leads	✅ DONE
3	📋 **Free Website Audit Tool**	A tool that analyzes any website and generates an audit report you can send to prospects	➡️ NEXT
4	📧 **Cold Email System**	Automated email templates + tracking for outreach campaigns	⬜ TODO
5	📱 **Social Media Lead Tracker**	A CRM-style dashboard to track your outreach, follow-ups, and deal pipeline	⬜ TODO

FULL PROGRESS TRACKER

Phase	Status	Description
Step 1	✅ DONE	Authority Website + Admin Dashboard
Step 2	✅ DONE	Google Maps Lead Scraper + Pipeline Dashboard
Step 3	➡️ NEXT	Free Website Audit Tool (Lead Magnet)
Step 4	⬜ TODO	Cold Email System (Outreach Engine)
Step 5	⬜ TODO	Social Media Lead Tracker (CRM Dashboard)
Step 6	⬜ TODO	First Clients + Case Studies
Step 7	⬜ TODO	Scale (Referrals + Ads + Content)

STEP 1 — Agency Landing Page ✅

Goal: Build a conversion-optimized landing page that screams credibility.

What was built:

- React + Vite SPA with dark mode, glassmorphism design
- Sections: Hero, Problem/Solution, 3-Step Process, Industry Focus, Pricing, Footer
- Floating WhatsApp CTA (→ +91 87439 33258)
- Password-protected Admin Dashboard with sidebar navigation
  - **General Info** — Edit location, email, WhatsApp
  - **Pricing Packages** — Set Starter/Growth/Pro prices
  - **Lead Pipeline** — Manage scraped leads
  - **View Site** — Quick link to live site
- Smooth scroll navigation with proper anchor links

Tech Stack: React, Vite, Express, Node.js
Access: `http://localhost:5173/` (site) | `http://localhost:5173/admin` (dashboard)
Admin Password: `growthaimaster`

STEP 2 — Lead Scraper + Pipeline Dashboard ✅

Goal: Automate prospect discovery. Find local businesses with weak digital presence.

What was built:

- Python + Playwright automated browser scraper
- SQLite database with deduplication
- Extracts: Business Name, Rating, Reviews, Phone, Website, Address, Maps URL
- "Hot Lead" detection (no website OR < 15 reviews)
- Full Lead Pipeline Dashboard inside Admin with:
  - Run scrapes from UI (enter query + count → Start)
  - Filter by: Industry, Rating, Hot Leads, No Website, Low Reviews (<15)
  - Real-time results count after filtering
  - Export CSV
  - Sortable columns + pagination
  - Direct Google Maps link per lead for sales team

Data collected so far:

- Dentists in Delhi (10 leads)
- Coaching Institutes in Delhi (10 leads)
- Real Estate Brokers in Delhi (10 leads)

- Interior Designers in Delhi (20 leads)
- **Total: 50 leads in database**

Tech Stack: Python, Playwright, SQLite, pandas

STEP 3 — Free Website Audit Tool ➡ SOON

Goal: Build a lead magnet that provides INSTANT value and captures contact info.

The Concept

A prospect enters their website URL + email on your landing page → The tool instantly generates a professional audit report showing everything wrong with their site → You follow up with a personalized pitch.

What it will do:

1. **Input:** Business owner enters their website URL + name + email + phone
2. **Analysis Engine:** The tool scans their site and checks:
   - Page load speed (Google PageSpeed Insights API)
   - Mobile-friendliness score
   - SEO score (meta tags, heading structure, alt tags, sitemap)
   - SSL certificate status
   - Google Business Profile presence
   - Social media links presence
   - Overall design/UX observations
3. **Output:** Generates a clean on-screen report + downloadable PDF with:
   - Overall score (e.g., 34/100)
   - Color-coded issues (Red: Critical, Yellow: Warning, Green: Good)
   - Specific recommendations per category
   - CTA: "Want us to fix this? Book a free call."
4. **Lead Capture:** Saves their email + phone + URL to your CRM/database for follow-up
5. **Dashboard Integration:** All audit submissions show in the Admin Dashboard

Why this works:

- **Free value upfront** builds trust instantly
- The report PROVES their site is bad — they can see the problems themselves
- You capture their contact info in exchange for the audit
- You can send this link to scraped leads: "I ran a quick audit on your site, here's what I found..."
- Conversion rate from audit → call: **15-25%** (much higher than cold outreach)

Technical Plan:

- Python backend (FastAPI or Express route) for the analysis engine

- Google PageSpeed Insights API (free tier: 25,000 requests/day)
- Custom SEO parser (BeautifulSoup / Cheerio)
- PDF generation for downloadable report
- New landing page section with the audit form
- Results stored in SQLite for CRM tracking

STEP 4 — Cold Email System 📧

Goal: Systematically contact scraped leads with personalized, automated email sequences.

What it will do:

1. **Email Template Builder** — Create reusable templates with dynamic variables:
   - `{{business_name}}`, `{{owner_name}}`, `{{city}}`, `{{website_issues}}`
2. **Multi-Touch Sequences** — Automated drip campaigns:
   - Day 1: Introduction + Audit Report link
   - Day 3: Follow-up with social proof
   - Day 7: "Last chance" with case study
3. **Tracking & Analytics:**
   - Open rate tracking (pixel)
   - Click tracking on links
   - Reply detection
   - Bounce handling
4. **Integration with Lead Pipeline:**
   - Select leads from the dashboard → Assign to email sequence
   - See email status per lead (sent, opened, clicked, replied)
5. **Compliance:**
   - Unsubscribe link in every email
   - CAN-SPAM compliant footer
   - Sending limits (max 50/day to avoid spam filters)

Message Framework:

```
Subject: Quick question about {{business_name}}'s online presence

Hi {{owner_name}},

I noticed {{business_name}} has {{specific_issue — e.g., 'no Google reviews' or 'the website
loads in 8 seconds'}}.

I put together a quick free audit — {{audit_link}}.

I help businesses like yours in {{city}} get 20–50 leads/month. Would a 10-min call be useful?
```

```
Best,
GrowthAI Team
```

Channels to support:

- **Email (primary)** — Gmail SMTP / SendGrid for reliable delivery
- **WhatsApp (secondary)** — 5-10 personalized messages/day (NOT bulk)
- **Loom Video Audits** — 3-5/week for highest-value leads

Technical Plan:

- Nodemailer + SendGrid API for email delivery
- Email template system with Handlebars
- Tracking pixel (1x1 transparent image) for open tracking
- Dashboard UI: Compose, schedule, track campaigns
- SQLite table for email sequence state management

STEP 5 — Social Media Lead Tracker (CRM) 📱

Goal: A CRM-style dashboard to track your entire sales pipeline from discovery to deal closed.

What it will do:

1. **Kanban Pipeline View:**
   - Columns: New Lead → Contacted → Audit Sent → Call Scheduled → Proposal Sent → Won / Lost
   - Drag-and-drop cards between stages
2. **Lead Detail Cards:**
   - Business info (from scraper)
   - All interaction history (emails sent, calls made, notes)
   - Audit report results (from audit tool)
   - Next follow-up date + reminder
3. **Activity Timeline:**
   - Log calls, meetings, messages
   - Attach notes and files
   - Track who did what (for team collaboration)
4. **Analytics Dashboard:**
   - Conversion rate per stage
   - Average time-to-close
   - Revenue pipeline value
   - Best performing outreach channel
5. **Follow-Up Reminders:**
   - Daily digest of leads needing follow-up

- Browser notifications for overdue leads

6. **Integration with other tools:**
   - Auto-import leads from scraper
   - Auto-update status from email tracking
   - Link to audit reports

Technical Plan:

- React components (drag-and-drop with react-beautiful-dnd)
- SQLite tables: leads, activities, pipeline_stages, reminders
- API endpoints for CRUD operations on pipeline
- Dashboard charts (recharts or chart.js)

STEP 6 — First Clients + Case Studies

Goal: Close 2-3 paying clients and generate real case studies.

Pricing:

Package	Price	What's Included
Starter	₹8,000/mo	Google Business Profile optimization + Basic local SEO + Monthly report
Growth	₹15,000/mo	Website + SEO + Google Ads management + Lead tracking
Pro	₹25,000/mo	Full funnel: Website + SEO + Google Ads + Meta Ads + Retargeting + Automation
Website Only	₹15,000-30,000 (one-time)	Custom website with SEO foundation

Strategy:

- Offer first 2-3 clients **50% off for 2 months** in exchange for a real testimonial
- Document EVERYTHING: before/after screenshots, lead counts, revenue generated
- Turn real results into case studies on your website

Your Positioning Statement:

"I help local businesses in Delhi generate 20-50 leads/month using AI-powered Google ranking and targeted ads"

STEP 7 — Scale

Goal: Systems and growth beyond manual outreach.

Actions:

- Build referral program (₹2,000 credit per referred client)
- Partner with CA firms and local business communities
- Start Meta Ads for your own agency (₹500-800/day budget)
- Create YouTube/LinkedIn content (long-term authority)
- Automate client reporting and lead tracking
- Hire a virtual assistant for outreach

CRITICAL RULES

⚠️ **Rule 1:** Do NOT start outreach until Step 3 (Audit Tool) is done. Every piece of the funnel must be ready.

⚠️ **Rule 2:** Maximum 5-10 personalized WhatsApp messages per day. Bulk spam = number banned.

⚠️ **Rule 3:** Always lead with VALUE, not with a sales pitch. The audit report sells for you.

⚠️ **Rule 4:** Realistic cold outreach conversion: Cold message → Reply: 3-5% | Reply → Call: 30-40% | Call → Client: 10-20% | End-to-end: 0.5-2%. Plan accordingly.

⚠️ **Rule 5:** The biggest risk is analysis paralysis. This plan is complete enough to execute. Don't wait for perfection.

WEEKLY ACTION RHYTHM (Once all tools are built)

Day	Action	Time
Monday	Scrape 20 new leads in 2 target niches	30 min
Tuesday	Send 10 personalized WhatsApp messages	45 min
Wednesday	Record 3 Loom video audits for top leads	1 hour
Thursday	Follow up on all pending conversations	30 min

Day	Action	Time
Friday	Post LinkedIn content + connect with 10 owners	30 min
Saturday	Review pipeline metrics, plan next week	20 min
Sunday	REST	—
